

## **Wednesday, 26<sup>th</sup> June**

Auditorium Angel Brage

New Results in Pancreatic Endoscopy & Surgery

16:45

**Integrating artificial intelligence with endoscopic ultrasound for the differential diagnosis of pancreatic solid neoplasms**

Matteo Tacelli, (Milano, Italy)

16:57

**Influence of mesenchymal stem cells enriched omentum on surgical healing of the pancreas**

Thales Penna De Carvalho, (Rio de Janeiro, Brazil)

17:09

**Antibiotic stewardship program in pancreatic surgery: a multicenter, before-after analysis.**

Matteo De Pastena, (Verona, Italy)

17:21

**Minimallyinvasive spleen-preserving distal pancreatectomy in obese patients: factors associated with clinically relevant pancreatic fistula**

Fabio Ausania, (Barcelona, Spain)

## **Thursday, 27<sup>th</sup> June**

Auditorium Angel Brage

Chronic Pancreatitis Session - Clinical

09:00

**Total pancreatectomy with islet auto-transplantation (TPIAT) for pancreatitis in pediatric patients results in clinically significant decreased opioid use, and improved patient outcomes post-TPIAT**

Cheryl J. Hartzell, (Cincinnati, United States)

09:12

**Investigation of the genetically determined "O" blood group in chronic pancreatitis**

Regina Stefanovics, (Szeged, Hungary)

09:24

**Development and efficacy of a novel monoclonal antibody targeting CX3CR1 for pain relief in pancreatic cancer and chronic pancreatitis**

Deniz Baybag, (Istanbul, Turkey)

09:36

**Long-term behaviour of pancreatic exocrine and endocrine function in patients with early chronic pancreatitis (CP) and factors associated with pancreatic functional impairment**

Yessica Domínguez-Novoa, (Santiago de Compostela, Spain)

Auditorium Mozart

Pancreatic Cancer Session – Basic Science

09:00

**Interplay of the proteotoxic CEL-MODY protein and oncogenic Kras in pancreatic cancer development**

Karianne Fjeld, (Bergen, Norway)

09:12

**Splicing-derived neoantigens as potential targets for immunotherapy in pancreatic cancer**

Alejandro Ibáñez-Costa, (Córdoba, Spain)

09:24

**Mapping functional to morphological variation reveals the basis of regional extracellular matrix subversion and nerve invasion in pancreatic cancer**

Pierluigi Di Chiaro, (Milano, Italy)

09:36

**Deciphering the spatio-temporal dynamic adaptation driven by the PDAC risk variant *Ctrb1*exon6-del**

Irene Felipe, (Madrid, Spain)

Auditorium Angel Brage

Pancreatic Cancer Session – Clinical

11:30

**Randomized phase III trial of induction chemotherapy followed by chemoradiotherapy or chemotherapy alone for non-resectable locally advanced pancreatic cancer: first results of the CONKO-007 trial**

Robert Grützmann, (Erlangen, Germany)

11:42

**Epipanc project: identification and clinical validation of non-invasive epigenetic biomarkers to diagnose and monitor the response to treatment in metastatic pancreatic cancer**

Elena Brozos-Vázquez, (A Coruña, Spain)

11:54

**Development and validation of AI-Assisted transcriptomic signatures to personalize adjuvant chemotherapy in patients with resectable pancreatic ductal adenocarcinoma**

Nelson Duseti, (Marseille, France)

12:06

**Performance of the EndPAC Risk score for pancreatic cancer in new onset diabetes patients with missing data – a database study in the British Population**

Claudia Mellenthin, (Freiburg, Switzerland)

Auditorium Mozart

Acute and Chronic Pancreatitis Session – Basic Science

11:30

**Misfolding trypsinogen mutant causes chronic pancreatitis in a preclinical mouse model**

Mate Sandor, (Los Angeles, United States)

11:42

**The store-independent activation of STIM1/ORAI1 complex regulates CFTR activity in secretory epithelial cells**

Arpad Varga, (Szeged, Hungary)

11:54

**Sarcopenia in experimental chronic pancreatitis is associated with upregulation of members of the TGF- $\beta$  superfamily to maintain key cellular processes in muscle tissue at the expense of myogenesis**

Marcel Gischke, (Greifswald, Germany)

12:06

**Unveiling VMP1-EVs: A Novel Perspective on Acute Pancreatitis**

María Inés Vaccaro, (Buenos Aires, Argentina)

Auditorium Mozart

Pancreatic Cancer Session – Basic Science

17:00

**Cancer stem cell-derived Pglyrp1 induces tumor microenvironment remodelling and immune suppression in pancreatic cancer**

Juan Carlos López-Gil, (Madrid, Spain)

17:12

**A next generation DNA vaccine coding for the immunodominant sequence of alpha-Enolase enhances the ability to induce effector T cell responses and promotes anti-tumor immunity in pancreatic cancer**

Silvia Brugiapaglia, (Torino, Italy)

17:24

**snRNAseq reveals the crucial role of tertiary lymphoid structures in driving b cell maturation into plasma cells in PDAC**

Carmen Mota Reyes, (Munich, Germany)

17:36

**Metabolic crosstalk between serine-dependent PDA tumor cells and CAFs revealed by mRNA translation analysis in patient-derived xenografts**

Shin Saueun, (Toulouse, France)

**Friday, 28<sup>th</sup> June**

Auditorium Angel Brage

Pancreatic cancer session – clinical

09:00

**Preliminary results of the PROPH-ITA study: genetic background of familial pancreatic cancer (FPC) patients enrolled in the Italian Registry of Families At Risk for Pancreatic Cancer (IRFARPC)**

Livia Archibugi, (Milan, Italy)

09:12

**Feasibility of endoscopic ultrasound-guided fine needle biopsy for generating patient-derived organoids of pancreatic ductal adenocarcinoma: preliminary results from a single-center prospective database**

Federica Borrelli De Andreis, (Rome, Italy)

09:24

**Prospective validation of a plasma metabolome multimarker panel (MxP®PancreasScore) for the exclusion of pancreatic cancer in cohorts at risk (META-PAC)**

Ujwal Mukund Mahajan, (Munich, Germany)

09:36

**Potential Impact of Dedicated Digital Solutions for Pancreatic Cancer Care in Europe: results from an EPC Survey**

Kasper Overbeek, (Rotterdam, Netherland)

Auditorium Mozart

Acute Pancreatitis Session - Clinical

09:00

**Single microRNA panel to detect and predict the severity of acute pancreatitis**

Robert Sutton, (Liverpool, United Kingdom)

09:12

**Randomized controlled trial: Low-molecular-weight heparin plus insulin for hypertriglyceridemia-associated acute pancreatitis**

Wenhua He, (Nanchang, China)

09:24

**The effect of a peripherally acting opioid antagonist on acute pancreatitis: a multicentre randomised controlled trial**

Cecilie Siggaard Knoph, (Aalborg, Denmark)

09:36

**Early on-demand versus delayed intervention for severe acute necrotizing pancreatitis**

Lu Ke, (Nanjing, China)

Auditorium Angel Brage

Cystic Pancreatic Lesions

12:00

**Hnf1b identified as a tumor suppressor gene in intraductal papillary and mucinous neoplasms (IPMN) using a novel mouse model**

Lorenzo Diane, (Paris, France)

12:12

**Association between diabetes and the risk of pancreatic cysts: a nationwide population-based study**

In Rae Cho, (Seoul, South Korea)

12:24

**Deep learning and endoscopic ultrasound: automatic detection and characterization of cystic and solid pancreatic lesions – a multicentric study**

António Miguel Martins Pinto Da Costa, (Madrid, Spain)

12:36

**Long term outcomes following resection of A-IPMN and PDAC: a propensity-score matched analysis**

James Lucocq, (Edinburgh, United Kingdom)

Auditorium Mozart

Pancreatic Cancer Session – Basic Science

12:00

**Re-education of tumor-associated macrophages with lipid nanoparticles to reduce pancreatic ductal adenocarcinoma liver metastasis**

Bruno Sainz, Jr., (Madrid, Spain)

12:12

**Pancreatic ductal adenocarcinoma ubiquitination profiling reveals specific prognostic and theranostic markers**

El Kaoutari Abdessamad, (Marseille, France)

12:24

**Unraveling the key steps in the progression of pancreatic cancer from acinar and ductal cell using single-cell RNA-sequencing**

Voz Marianne, (Liege, Belgium)

12:36

**Characterization of the immune microenvironment of pancreatic ductal adenocarcinoma and its precursor lesions with deep learning**

Manuel Michels, (Duesseldorf, Germany)

Saturday, 29<sup>th</sup> June

Auditorium Angel Brage

Pancreatic Cancer Session - Clinical

09:30

**Insulin-like growth factor binding protein-3, macrophage migration inhibitory factor and adrenomedullin as a serum biomarkers for chronic pancreatitis and pancreatic ductal adenocarcinoma differentiation**

Włodarczyk Barbara, (Lodz, Poland)

09:42

**EUS-guided detective flow imaging (DFI): A new advanced imaging technique for the differential diagnosis of solid pancreatic tumours**

Julio Iglesias-García, (Santiago de Compostela, Spain)

09:54

**Resection to exploration ratios and associated outcomes in patients with pancreatic ductal adenocarcinoma**

Fabio Casciani, (Verona, Italy)

10:06

**Futility of upfront resection for anatomically resectable pancreatic cancer: a Metroticket approach**

Giulia Gasparini, (Milan, Italy)

Auditorium Angel Brage

Acute Pancreatitis Session – Clinical

11:30

**Serum GAS6 and PROS1 levels at admission are effective biomarkers for identifying patients with severe acute pancreatitis**

Xiuli Zhang, (Beijing, China)

11:42

**Pediatric acute pancreatitis fluid management: under-resuscitation is associated with higher rates of progression to severe acute pancreatitis outcomes**

Peter Farrell, (Cincinnati, United States)

11:54

**Predicting the need for step-up after EUS-guided drainage of peripancreatic fluid collections, including QNI score validation: a prospective cohort study**

Giuseppe Vanella, (Milan, Italy)

12:06

**PAN-PROMISE scale validation in a clinical trial. A waterfall post-hoc analysis**

Claudia Sánchez-Marin, (Santander, Spain)
